

Technology Demonstrations

Experience VII and other vehicle technologies right on the streets of New York.

This World Congress will feature the largest fully-integrated demonstration showcasing vehicle-to-vehicle and vehicle-to-roadside communication technologies and services. The demonstrations will include innovative mobility solutions operating on the streets and highways of New York and will build upon the success of the "Innovative Mobility Showcase" that proved to be an enormous success at the 12th World Congress in San Francisco.

Pre-registration is required to attend the VII Demonstrations.

PLEASE NOTE: For security, safety, and logistics reasons, attendees will not be able to enter the 11th Avenue Theater or buses for the VII Testbeds on their own. All attendees who register for the VII Testbed demonstrations must board one of the official World Congress buses. These buses will depart from the Jacob K. Javits Convention Center entrance on 11th Avenue. You must have a ticket to board these buses.
